

Dear Medical students of clinical years,

Study will return to normal on Sunday morning, August 30, 2020, and we invite all of you to be reassured, regardless of the colors and intensity of the alert you have received on "Aman" app, and just follow the instructions that we will explain in this announcement.

Every student who has received a red or orange notification on "Aman" (extreme or high risk) must contact the Ministry of Health hotline (111), whom in turn will make sure whether there has been a close, confirmed contact with a person who is confirmed to be COVID-19 positive (whether the person is one of the Hospital patients, visitors, working staff, or even anyone outside the university and the hospital). Among the most important conditions for the possibility of a close contact:

1. There is no safety distance (at least 2 meters) at the time of contact.
2. Not wearing a face-mask at the time of contact.
3. The contact period is more than 15 minutes.

In the event that close and confirmed contact has occurred, the Ministry will direct the student to conduct a (COVID-19) test, and often for University of Jordan students, they will be directed to conduct the examination in the emergency department at the University of Jordan Hospital (without the need to take a referral from the students' clinic for this issue only), and then

It will also determine whether the student can return to school or move to temporary home quarantine.

Every student (regardless of the notification he has on the Aman app) who suffers from any of the common symptoms of (COVID-19), which is clearly evident in the official media, as well as the picture attached in this announcement, can go to the emergency department at the University of Jordan Hospital (without the need to take a referral from the students' clinic for this matter only), and the necessary action will be made there.

For every student who appears to have reassurance notices on the Aman app and knows the fact that he has had contact with someone who is suspected or confirmed COVID-19 positive, or for any reason that makes him question the notice he has in the Aman app, he should contact the Ministry of Health hotline (111), who in turn will take the necessary action.

Otherwise, we assure you that you can participate in all educational activities of the departments and divisions in the school and the University of Jordan Hospital, as well as the external hospitals, while you fully maintain and adhere to the measures and precautions for safety and infection control, and strictly adhere to them without complacency and belittling, by wearing masks throughout the working time and sufficient spacing and distancing (2 meters) from surrounding colleagues, patients and visitors, wearing gloves

when necessary (such as clinical examination and the use of any medical materials or equipment), leaving classrooms and training places in the hospital or university immediately upon completion, and not forming gatherings in those facilities (whether internal or external).

In the end, this is a battle with the epidemic that the world is fighting, and we are part of it. We have a cost that must be paid, and everyone should contribute to reducing the consequences.

May you all to stay well and in peace

# What are the most common symptoms of COVID-19

Cough

Fever

Shortness of breath

Sore throat

Headache

Runny nose

Tiredness

Muscle pain

Diarrhoea

Loss of smell

Loss of taste

!
