POSTGRADUATE TRAINING

❖ JORDAN UNIVERSITY HOSPITAL (JUH)

This is a major teaching hospital with a 500 bed capacity. It contains an Intensive Care Unit, Coronary Care Unit, Neonatal Intensive Care Unit in addition to Burns and Renal Units. It is also a major Oncology Center. JUH is a major tertiary referral centre within Jordan. All major branches of medicine and surgery are supported and include a busy Accident and Emergency Department.

House Officer 1983-1984

In Jordan, this consists of a one-year rotation through medicine, surgery, pediatrics, obstetrics, gynecology and accident & emergency. This is a busy teaching hospital with a wide spectrum of disease and excellent facilities.

Senior House Officer in Surgery 1984-1985

I was appointed to this post in 1984 and rotated through general surgery, orthopedics, urology, neurosurgery and accident & emergency. In addition to assisting in general surgery and trauma surgery, I gained experience in insertion of peripheral and central venous lines and minor surgical procedure.

The Radiology Department at (JUH)

This consists of 4 general and 2 fluoroscopy rooms. There is an additional biplane fluoroscopy unit. The department contains 2 spirals CT scanner, a digital angiography suite and 2 coloured Doppler ultrasound machines, in addition to 2 mammography machines and 1.5 Tesla MRI with all soft wares including functional images. A Nuclear Medicine Department is adjacent.

1. Radiology Training 1985-1987

I was appointed as a Registrar in Radiology in the above department. There I learned to perform routine barium studies, IVU examinations and miscellaneous screening procedures such as venography, HSG, micturation cystograms and urethrograms. I was also trained in accident & emergency and plain film reporting.

2. Senior Registrar 1987-1989

I was appointed to this post in 1987 where I continued my radiology training. As a Senior Registrar, I was able to learn and perform unaided conventional and digital angiography, ultrasound arthrography and CT scanning. I also performed some limited interventional procedures including percutaneous cholangiograms in addition to in- and out-patient plain film reporting. I was involved in teaching radiological techniques and principles to Medical Students and Junior Registrars within the department. I also conducted interdepartmental clinical radiological meetings.

- An annual examination was undertaken and passed at each attempt.
- Promotion was related to each successful examination pass.

3. Radiology Lecturer 1989-1992

I was appointed to this post in 1989 as a Lecturer in Radiology at the University of Jordan and as a Specialist in the Radiology Department which is considered equivalent to a Consultant post in the United Kingdom.

❖ **RADIOLOGY DEPARTMENT**
GLASGOW WESTERN INFIRMARY (Scotland-UK)

I took up the position of Registrar in Radiology in the Department in October 1992 in order to prepare myself for the FRCR Examination. During this time, I received further training and experience in plain film reporting, barium studies, intravenous urography and miscellaneous screening procedures. I had also undertaken supervised angiography, CT scanning and ultrasound. I passed the Part 1 FRCR examination.

I had been involved in creating a Part 1 FRCR teaching file and added extensively to the departmental collection. I had been involved in teaching other Registrars within the department.

I passed part II (A & B) FRCR in 1995, and took up the position of senior Registrar and I was involved in teaching medical students as well as other Registrars in the department. I also conducted medical meetings with different departments. I performed all procedures without direct supervision specially vascular and interventional, and I supervised the Registrars in their daily work. I was involved in expanding the part II FRCR teaching file and also conducted city-wide activities; specially film viewing and Tutorials for part I and part II candidates.

TEACHING EXPERIENCE

1996-Present time

- ❖ Under graduate Courses:
 - Clinical Radiology for Medical students
 - MRI & CT Courses for Radiographic students
 - Diagnostic Radiology for Physiotherapy students

- ❖ Postgraduate Courses in Diagnostic radiology for (Residents & Fellows) of:
 - Radiology
 - Internal Medicine
 - Endocrinology
 - Neuroscience
 - Respiratory
 - Head & Neck
