

1.	Course title	Special surgery - Neurosurgery
2.	Course number	0506504
	Credit hours	2 hours out of 12 special surgery
3.	Contact hours (theory, practical)	Theory: 13 Lectures
		Practical: 14 days of clinical training and interactive activities
4.	Prerequisites/Corequisites	
5.	Program title	Doctor of Medicine
6.	Program code	N/A
7.	Awarding institution	The University of Jordan
8.	School	School of Medicine
9.	Department	Special Surgery Department
10.	Course level	Bachelor
11.	Year of study and semester (s)	Fifth year
12.	Other department (s) involved in teaching the course	NA
13.	Main Learning language	English
14.	Learning Types	□Face to face learning x□Blended □Fully online
15.	Online platforms(s)	$\Box Moodle  x \Box Microsoft Teams  \Box Skype  x \Box Zoom  \Box Others$
16.	Issuing/Revision Date	30/12/2023

### 17. Course Coordinator:

Name: Dr Mahmoud Abdallat						
Contact hours: Monday 12 – 2 pm and Wednesday 11 am- 1pm						
Office number:	Neurosurgery clinic	<b>Phone number:</b> 0096265353444				
Email: <u>Mahmoud.abdallat@ju.edu.jo</u>						

#### **18. Other instructors:**

Name: Prof. Walid Maani	Contact hours: Monday and Tuesday (11-12)				
Office number: Neurosurgery clinic/JUH	Phone number: 0096265353444				
Email: <u>wmaani@gmail.com</u>					
Name: Dr.Tareq Kanaan	Contact hours: Sundays and Thursdays (10-11)				
Office number: Neurosurgery clinic/JUH	Phone number: 0096265353444				
Email: <u>tkanaan@web.de</u>					
Name: Dr. Qussai Alsabagh	Contact hours: Sundays and Tuesdays (11:00-12:00)				
Office number: Neurosurgery clinic/ JUH	Phone number: 0096265353444				
Email: Q.alsabbagh@ju.edu.jo					

#### **19. Course Description and Aims:**

#### **A- Course Description:**

This course covers a wide variety of common neurosurgical and traumatology topics, Students learn about the basics, etiology, pathogenesis, signs and symptoms of different neurosurgical and traumatology conditions and to be able to integrate the clinical, laboratory and radiological means to reach a diagnosis of common pathologies, in addition to ways of their conservative and surgical treatment including physiotherapy and rehabilitation.

The rotation period is 2 weeks of clinical training including seminars, group discussions, attending outpatients and teaching rounds.

#### **B- Aims:**

For the student to be able to perform a focused history and physical examination of the patient with a neurosurgical complaint, to be able to identify the basic signs on regular skull and spine X-rays, to differentiate between CT scans and MRI, and to be able to diagnose and initially treat neurosurgical emergencies and how we manage common pathologies. The program of medical doctor (MD) provides opportunities for the students to develop and demonstrate knowledge attitudes and skills in the areas listed below. The learning outcomes specified reflect the expectation of the community as broadly pointed to in the university mission.

# 20. Program Intended Learning Outcomes (PLOs) (To be used in designing the matrix linking the intended learning outcomes of the course with the intended learning outcomes of the program):

- 1. Demonstrate basic knowledge of normal human structure and function at molecular, genetic, cellular, tissue, organ, system and whole-body levels in terms of growth, development, and health maintenance. Analyze the basic molecular and cellular mechanisms involved in the causation and treatment of human disease and their influence on clinical presentation and therapy.
- 2. Collect, interpret, document, and communicate accurately a comprehensive medical history, including the psychological and behavioral factors, and a thorough organ-system-specific physical examination inclusive of the mental status of the patient.
- 3. Integrate and communicate collected clinical information in the construction of appropriate diagnostic and therapeutic management strategies to identify life-threatening conditions ensuring prompt therapy, referral, and consultation with relevant disciplines and skillfully perform basic medical procedures for general practice on patients with common illness, acute and chronic, taking into account environmental, social, cultural and psychological factors.
- 4. Demonstrate in-depth knowledge of the epidemiology and biostatistics of common diseases, and analyze the impact of ethnicity, culture, socioeconomic factors and other social factors on health, disease and individual patient's health care.
- 5. Communicate effectively and professionally, both orally and in writing, with patients, their families, and with other healthcare providers utilizing information technology resources in his/her scholarly activities and professional development with the ability to teach others, and to understand and respect other healthcare professionals 'roles, and apply the principles of multidisciplinary teamwork dynamics and collaboration.
- 6. Apply scientific methods including evidence –based approach to the medical practice including problem identification, data collection, hypothesis formulation, etc., and apply inductive reasoning to problem solving and ensure that clinical reasoning and decision making are guided by sound ethical principles.
- 7. Demonstrate knowledge of scientific research methods and ethical principles of clinical research and be able to write research proposals or research papers.
- 8. Demonstrate professionally the skills needed for Quality improvement, lifelong learning, and continuous medical education including the ability to identify and address personal strength and weakness, self-assess knowledge and performance, and develop a self-improvement plan.

# **21. Intended Learning outcomes of the course (CLOs): Upon completion of the course, the student will be able to achieve the following intended learning outcomes:**

1. Understand the principles of management of the neurosurgical disorders

2. Understand the principles of medical care of neurosurgical patients.

3. Identify neurological disorders that are best treated by surgery.

4. Demonstrate awareness of the appropriate surgical techniques and recommended postoperative care.

5. Select the appropriate methods for the diagnosis of neurosurgical disorders and diseases of the peripheral and central nervous system and their management.

6. Communicate with patients, colleagues, and staff verbally and in writing.

7. Manipulate data in form of data collection, analysis, and interpretation.

8. Apply the problem-solving approach in the practice of medicine.

22.	. The matrix linking the intended learning outcomes of the course with the intended
lea	urning outcomes of the program):

Program	CLO (1)	CLO (2)	CLO (3)	CLO (4)	CLO (5)	CLO (6)	CLO (7)	CLO (8)

## 23. Topic Outline and Schedule:

Week	Lecture	Topic	Student Learning Outcome (SLO)	Descriptors **	Learning Types (Face to Face/Blended/ Fully Online)	Platform Used	Synchronous / Asynchronous Lecturing	Evaluation Methods	Learning Resources
	1.1	Head injury	To be able to diagnose, investigate and manage. Know types and classification of HI and early and late complications. Differentiate types of intracranial hematomas on CT scans .	K S C	Face to face		Synchronous Lecturing	Written exam OSCE exam Attendance Evaluation	*
1	1.2 Spinal injury To be able to diagnose, investigate and manage.		K S C	Blended	Zoom	Synchronous Lecturing	Written exam OSCE exam Attendance Evaluation	*	
	1.3	Hydrocephalus and spina bifida	To be able to diagnose, investigate and manage.	K S C	Face to face		Synchronous Lecturing	Written exam OSCE exam Attendance Evaluation	*
	1.4	Degenerative spinal diseases	To be able to diagnose, investigate and manage disc prolapse and canal stenosis in lumbar and cervical spine and know common surgical procedures for their management.	K S C	Face to face		Synchronous Lecturing	Written exam OSCE exam Attendance Evaluation	*
	1.5	Brain tumours	To be able to diagnose and investigate and acknowledge management	K S C	Blended	Zoom/ Teams	Synchronous Lecturing	Written exam OSCE exam Attendance Evaluation	*
	1.6	Spinal tumours	To be able to diagnose and investigate.	K S C	Face to face		Synchronous Lecturing	Written exam OSCE exam Attendance Evaluation	*
	1.7	Intracranial hypertension	To be able to diagnose, investigate and manage.	K S	Face to face		Synchronous Lecturing	Written exam	*

#### 24. Evaluation Methods:

Opportunities to demonstrate achievement of the SLOs are provided through the following assessment methods and requirements:

Evaluation Activity	Mark	Topic(s)	SLOs	Descriptors**	Period (Week)	Platform	
Subsurgery OSCI	30	Head injury, Spinal injury, Hydrocephalus, and spina bifida, Degenerative spinal diseases, Brain tumours, Spinal tumours, Intracranial hypertension, Epilepsy and functional neurosurgery, Subarachnoid haemorrhage	1.1,1.2,1.3,1.4,1.5,1. 6,1.7,2.1,2.2	K S C	Part of the end of sub surgery course exam	Paper- based exam	
Evaluation including attendance	20	Head injury, Spinal injury, Hydrocephalus, and spina bifida, Degenerative spinal diseases, Brain tumours, Spinal tumours, Intracranial hypertension, Epilepsy and functional neurosurgery, Subarachnoid haemorrhage	1.1,1.2,1.3,1.4,1.5,1. 6,1.7,2.1,2.2	K S C	At the end of the 2 weeks ENT rotation	-	
End of year MCQ test as part of sub surgery exam 50 Head injury, Spinal injury, Hydrocephalus, and spina bifida, Degenerative spinal diseases, Brain tumours, Spinal tumours, Intracranial hypertension, Epilepsy and functional neurosurgery, Subarachnoid haemorrhageconditions, Epistaxis & nasal trauma, Chronic suppurative otitis media		1.1,1.2,1.3,1.4,1.5,1. 6,1.7,2.1,2.2	K S C	At the end of each academic year (usually in June)	Computer or paper- based exam		
** K: Knowledge, S: Skills, C: Competency							

#### **25. Course Requirements**

- ✓ Class room Lectures
- ✓ Seminar room
- ✓ Internet connection and lecturing tools (Zoom/ Teams. Etc)
- ✓ Outpatient clinics
- ✓ Neurosurgery surgery theatres

#### 26. Teaching Methods and Assignments:

#### Development of ILOs is promoted through the following <u>teaching and learning methods</u>:

- ✓ Morning and evening class room/ online lectures
- ✓ Interactive activities and case discussions
- ✓ Outpatient clinics
- ✓ Seminar discussions
- ✓ Observation of Neurosurgery common surgeries

#### **27. Course Policies:**

#### A- Attendance policies:

Attendance will be monitored by the course coordinator. Attendance policies will be announced at the beginning of the course.

#### B- Absences from exams and handing in assignments on time:

Will be managed according to the University of Jordan regulations. Refer to <u>http://registration.ju.edu.jo/Documents/daleel.pdf</u>

#### C- Health and safety procedures:

Faculty Members and students must always, conform to Health and Safety rules and procedures.

#### D- Honesty policy regarding cheating, plagiarism, misbehavior:

As a student in this course (and at this university) you are expected to maintain high degrees of professionalism, commitment to active learning and participation in this course and integrity in your behavior in and out of the classroom. Students violate this policy would be subjected to disciplinary action according to University of Jordan disciplinary policies.

#### E- Grading policy:

Grade-point average, Rules are preset by the Faculty and Department Councils

#### F- Available university services that support achievement in the course:

Availability of comfortable lecture halls, data show, internet service and E learning website https://elearning.ju.edu.jo/ .

#### 27. References:

A. Required book (s), assigned reading and audio-visuals: <u>Essential Neurosurgery</u>, Andrew H. Kaye. Handbook of Neurosurgery by Mark S. Greenberg

**B.** Recommended books, materials, and media: Web based resources: https://www.uptodate.com/
